### REVIEW

on the basic professional educational programme of higher education in the direction of training 44.03.01 Pedagogical Education,
Programme Music Education, developed by the
FSBEO HE Bunin Yelets State University

Peer-reviewed basic professional educational program (BPEP) in the direction of training 44.03.01 Pedagogical Education, Programme Music Education is a system of educational and methodological documents developed by the university taking into account the requirements of the labor market on the basis of the federal state educational standard of higher education in the corresponding direction of higher education (FSES HE).

BPEP is a set of basic characteristics of education (scope, content, planned results), organizational and pedagogical conditions, forms of attestation, which is presented in the form of a curriculum, calendar academic schedule, working programs of disciplines, programs of practical training, program of state final attestation, as well as assessment and methodological materials that ensure the implementation of educational technologies used.

The structure of BPEP includes a compulsory part and a part formed by participants of educational relations, based on the scientific and pedagogical experience accumulated by the university in the implementation of basic and additional professional educational programs in the relevant field of professional activity, established scientific schools of the university and the needs of the labor market.

The curriculum and calendar schedule are developed in accordance with the requirements of the Federal State Educational Standards of Higher Education to the structure of the program. The structure of the plan is logical and consistent.

The conditions for the implementation of the program are defined: system-wide requirements, requirements for material, technical, educational and methodological support, requirements for personnel and financial conditions for the implementation of the program, as well as requirements for the applicable mechanisms for assessing the quality of educational activities and training of students in the program.

BPEP in the direction of training 44.03.01 Pedagogical Education, Programme Music Education is provided by the working programs of all academic disciplines and practice programs. Evaluation of the working programs of academic disciplines and practice programs allows us to conclude about their high quality and sufficient level of methodological support. The content of disciplines and practices corresponds to the competent model of a graduate.

-State final certification includes the preparation and defense of the final qualification work, designed in accordance with the requirements for this type of work.

During the review of the assessment materials, it was established that the criteria and indicators for assessing competencies and assessment scales ensure a

comprehensive assessment of learning outcomes and the level of competence development; control tasks and other materials for assessing learning outcomes of the BPEP were developed based on the assessment principles: validity, certainty, unambiguity, reliability; meet the requirements for the composition and interrelation of assessment tools and allow for an objective assessment of learning outcomes and levels of competence development. The volume of assessment materials corresponds to the curriculum of the training area, their content corresponds to the goals of the BPEP, the future professional activities of students. In our opinion, the quality of assessment materials ensures the objectivity and reliability of the results when assessing learning outcomes.

The developed BPEP for the training area 44.03.01 Pedagogical education, Programme Music Education fully corresponds to the declared level of training, is meaningful, has all the necessary elements and can be used in the educational

process of the FSBEO HE Bunin Yelets State University.

### REVIEW

on the basic professional educational programme of higher education in the direction of training 44.03.01 Pedagogical Education,
Programme Music Education, developed by the Institute of Culture, History and Law of the

FSBEO HE Bunin Yelets State University

The BPEP HE in the field of training 44.03.01 Pedagogical education, Programme Music education, submitted for review, is a system of documents developed at the FSBEO HE Bunin Yelets State University taking into account the needs of the regional labor market on the basis of the federal state educational standard of higher education (FSES HE) in the field of training 44.03.01 Pedagogical education.

BPEP HE regulates the goals, expected results, content, conditions and technologies for the implementation of the educational process, assessment of the quality of graduate training and includes: curriculum, academic calendar, work programs of disciplines, internship programs, the program of state final certification, as well as assessment and methodological materials that ensure the implementation of the educational technologies used.

The curriculum of the BPEP HE, developed in accordance with the Federal State Educational Standard of Higher Education, consists of a mandatory part and a part formed by the participants of educational relations.

The competitive advantages of the reviewed BPEP HE include maximum consideration of employers' requirements in the formation of disciplines, the content of which allows for the formation of the necessary competencies of the graduate; the involvement of experienced faculty, as well as representatives of organizations engaged in labor activity in the professional sphere corresponding to the professional activity for which graduates are being prepared.

The quality of the substantive component of the curriculum is beyond doubt. The disciplines included in the curriculum reveal the essence of the current problems of the professional sphere. The structure of the plan is logical and consistent. The assessment of the working programs of academic disciplines and internship programs allows us to conclude that they are of high quality and have a sufficient level of methodological support. The content of disciplines and internships corresponds to the competency model of the graduate.

The state final certification includes the preparation and defense of a final qualifying work, designed in accordance with current regulations. When reviewing the assessment materials, it was established that the criteria and indicators for assessing competencies, assessment scales ensure a comprehensive assessment of learning outcomes, the level of competence development; control tasks and other materials for assessing learning outcomes of the Basic Educational Program of Higher Education have been developed based on the assessment principles: validity, certainty, unambiguity, reliability; they comply with the requirements for

the composition and interrelation of assessment tools and allow for an objective assessment of learning outcomes and levels of competence development. The volume of assessment materials corresponds to the curriculum of the training area, their content corresponds to the goals of the Basic Educational Program of Higher Education, the future professional activities of students. Consequently, the quality of the assessment materials ensures the objectivity and reliability of the results when assessing learning outcomes.

The developed BPEP HE in the direction of training 44.03.01 Pedagogical education, Programme Musical education fully corresponds to the declared level of training, is meaningful, has all the necessary elements and can be used in the educational process of the FSBEO HE Bunin Yelets State University.

Able to carry out spiritual and moral education of students based on basic national values  - the basics of the theory and methods of education: principles and approaches to the implementation of the educational process, forms, methods and technologies of education, the content of education and the components of the basic culture of the individual; - methods and techniques for forming value orientations of students, developing moral feelings (conscience, duty, empathy, responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to:  - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess:  - methods and techniques for forming a moral attitude of students to the surrounding reality;  - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  - principles of organizing monitoring and evaluation of students' educational results;  - special technologies and methods of monitoring and evaluation of educational results;  - special technologies and methods that allow identifying and correcting learning difficulties  To possess:  - methods of monitoring and evaluation of indicators of the level and dynamics of students' development;  - conduct pedagogical diagnostics and correction of learning difficulties  To possess:  - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject);  - special methods that allow identifying and correcting learning difficulties  To know:
and moral education of students based on basic national values    Approaches to the implementation of the educational process, forms, methods and technologies of education, the content of education and the components of the basic culture of the individual; - methods and techniques for forming value orientations of students, developing moral feelings (conscience, duty, empathy, responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)    To be able to:
students based on basic national values  forms, methods and technologies of education, the content of education and the components of the basic culture of the individual; - methods and techniques for forming value orientations of students, developing moral feelings (conscience, duty, empathy, responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to:  - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess:  - methods and techniques for forming a moral attitude of students to the surrounding reality;  - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  - apply tools, methods of monitoring and evaluation of students' educational results;  - technologies and methods of monitoring and evaluation of educational results:  - special technologies and methods that allow identifying and correcting learning difficulties  To possess:  - methods of monitoring and evaluation of students' educational results;  - conduct pedagogical diagnostics and correction of learning difficulties  To possess:  - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject);  - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
education and the components of the basic culture of the individual; - methods and techniques for forming value orientations of students, developing moral feelings (conscience, duty, empathy, responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to: - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - special technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties
- methods and techniques for forming value orientations of students, developing moral feelings (conscience, duty, empathy, responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to:  - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess:  - methods and techniques for forming a moral attitude of students to the surrounding reality;  - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  - principles of organizing monitoring and evaluation of students' educational results;  - technologies and methods of monitoring and evaluation of educational results;  - special technologies and methods that allow identifying and correcting learning difficulties  To be able to:  - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development;  - conduct pedagogical diagnostics and correction of learning difficulties  To possess:  - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject);  - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
students, developing moral feelings (conscience, duty, empathy, responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to:  - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess:  - methods and techniques for forming a moral attitude of students to the surrounding reality;  - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  - principles of organizing monitoring and evaluation of students' educational results;  - technologies and methods of monitoring and evaluation of educational results;  - special technologies and methods that allow identifying and correcting learning difficulties  To be able to:  - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development;  - conduct pedagogical diagnostics and evaluation of learning difficulties  To possess:  - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject);  - special methods that allow identifying and correcting learning difficulties
responsibility, etc.), forming a moral character (patience, mercy, etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to:  - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess:  - methods and techniques for forming a moral attitude of students to the surrounding reality;  - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  Able to monitor and evaluate the formation of students' educational results;  - technologies and methods of monitoring and evaluation of students' educational results;  - technologies and methods of monitoring and evaluation of indicators of the level and dynamics of students' development;  - conduct pedagogical diagnostics and evaluation of indicators of the level and dynamics of students' development;  - conduct pedagogical diagnostics and correction of learning difficulties  To possess:  - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject);  - special methods that allow identifying and correcting learning difficulties
etc.), a moral position (the ability to distinguish between good and evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to: - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
evil, to show selflessness, readiness to overcome life's trials), moral behavior (readiness to serve people and the Fatherland)  To be able to: - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
behavior (readiness to serve people and the Fatherland)  To be able to: - create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results: - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
To be able to:
- create educational situations that contribute to the development of a moral position, spirituality, and a value-based attitude towards a person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
a moral position, spirituality, and a value-based attitude towards a person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  GPC-5  Able to monitor and evaluate the formation of students' educational results; - technologies of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
person in students  To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  GPC-5 Able to monitor and evaluate the formation of students' educational results; - technologies of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
To possess: - methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  GPC-5 Able to monitor and evaluate the formation of students' educational outcomes, identify and correct learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
- methods and techniques for forming a moral attitude of students to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
to the surrounding reality; - methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know: - principles of organizing monitoring and evaluation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
- methods of assimilation by the younger generation and implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  - principles of organizing monitoring and evaluation of students' educational results;  - technologies and methods of monitoring and evaluation of educational results;  - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  To know:
implementation into practical actions and behavior of spiritual values (individually personal, universal; national, family, etc.)  To know:  - principles of organizing monitoring and evaluation of students' educational outcomes, identify and correct learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  To know:
Able to monitor and evaluate the formation of students' educational outcomes, identify and correct learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
GPC-5 Able to monitor and evaluate the formation of students' educational outcomes, identify and correct learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
Able to monitor and evaluate the formation of students' educational results; - technologies and methods of monitoring and evaluation of educational results; - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  To know:
evaluate the formation of students' educational outcomes, identify and correct learning difficulties  - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
students' educational outcomes, identify and correct learning difficulties  - technologies and methods of monitoring and evaluation of educational results; - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
outcomes, identify and correct learning difficulties  - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
correct learning difficulties  - special technologies and methods that allow identifying and correcting learning difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
difficulties  To be able to: - apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
- apply tools, methods of diagnostics and evaluation of indicators of the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
the level and dynamics of students' development; - conduct pedagogical diagnostics and correction of learning difficulties  To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
difficulties To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6 To know:
To possess: - methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
- methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
- methods of monitoring and evaluation of students' educational results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
results (personal, subject, meta-subject); - special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
- special methods that allow identifying and correcting learning difficulties  GPC-6  To know:
difficulties  GPC-6 To know:
Able to use psychological the laws of personality development and manifestation of
and pedagogical personality traits, psychological laws of periodization and crises of
technologies in development;
professional activities psychological and pedagogical technologies of individualization of
necessary for the training, development, education;

training, development,
upbringing, including
students with special
educational needs

activities taking into account the individual characteristics of students;

- the main patterns of age development, socialization of the individual:
- indicators of individual characteristics of life trajectories, their possible deviations, as well as the basics of their psychodiagnostics

### To be able to:

- use knowledge about the developmental characteristics of students in planning and organizing educational and upbringing work; apply educational technologies for individualization of training, development, education;
- compile (jointly with a psychologist and other specialists) a psychological and pedagogical characteristic (portrait) of the student's personality;
- build educational activities taking into account the cultural differences of children, gender, age and individual characteristics

### To possess:

- actions of taking into account the developmental characteristics of students in conducting individual educational activities;
- actions of using educational technologies in professional activities for individualization of training, development, education, including students with special educational needs;
- actions of providing targeted assistance to students, including those with special educational needs;
- actions of developing (jointly with other specialists) and implementing, together with parents (legal representatives), programs for the individual development of the child; techniques for understanding the content of documentation of specialists (psychologists, defectologists, speech therapists, etc.) and its use in work

### GPC-7

Able to interact with participants of educational relations as part of the implementation of educational programmes

### To know:

- laws and features of building interactions between participants in educational relations;
- basic patterns of family relations that allow for effective work with the parent community;
- patterns of formation of children-adult communities, their sociopsychological characteristics and patterns of development of children's and adolescent communities

### To be able to:

- select forms, methods, techniques of interaction with different participants in the educational process (students, parents, teachers, administration) in accordance with the context of the situation;
- cooperate with other teaching staff and specialists in solving educational problems

### To possess:

- actions to identify behavioral and personal problems of students related to the peculiarities of their development;
- actions to interact with other specialists within the framework of a psychological, medical and pedagogical council;
- skills of building (or constructing) interactions with different participants in educational relations (students, parents, teachers,

	administration) within the framework of the implementation of
	educational programs
GPC-8	To know:
Able to carry out teaching	- special, including subject and methodological scientific
activities based on special	knowledge;
scientific knowledge	- the basics of pedagogical activity of a subject teacher (according
_	to the profile of the educational program)
	To be able to:
	- use modern technologies and methods of organizing class and
	extracurricular activities;
	- use traditional and modern forms and methods of educational
	work, including in the subject area
	To possess:
	- skills in organizing various types and forms of classes taking into
	account the specifics of the subject area;
	- actions in organizing various types of extracurricular activities:
	play, educational and research, artistic and productive, cultural and
	leisure
GPC-9	To know:
Able to understand the	- principles of operation of modern information technologies and
operating principles of	methods of their use to solve problems of professional activity
modern information	To be able to:
technologies and use them	- reasonably choose modern information technologies and use them
to solve professional	to solve problems of professional activity
problems	To possess:
	- skills of working with modern information technologies, methods
	of their use to solve problems of professional activity

# Professional competencies of graduates, established by the university, and indicators of their achievement

Professional competencies established by the bachelor's degree program have been developed taking into account the professional standard "Teacher (teaching activity in the field of preschool, primary general, basic general, secondary general education) (educator, teacher)".

Generalized labor function (GLF):

A Pedagogical activity on designing and implementing the educational process in educational organizations of preschool, primary general, basic general, secondary general education

Qualification level: 6.

Labor functions:

A/01.6 General pedagogical function. Training

A/02.6 Educational activity

A/03.6 Developmental activity.

B. Pedagogical activity on designing and implementing

basic general educational programs

Qualification level: 6.

## Labor functions:

B/03.6 Pedagogical activity on implementing programs of basic and secondary general education

Code and name of professional competence	Indicators of competence achievement
PCS-1 Able to teach an academic subject based on the use of subject-specific methods and use modern educational technologies that ensure the achievement of meta-subject, subject	To know: - fundamentals of specific teaching methods(techniques) in the subject area; - characteristics of students' personal, meta-subject and subject results in the context of teaching in the subject area (according to the Federal State Educational Standard and the model curriculum); - modern educational technologies and methodological patterns of their selection; - methods of monitoring, assessing and correcting learning results in the subject area
and personal results	To be able to:    - design a work program in the subject area;    - design and implement various forms of training and organization of extracurricular activities of students in the subject area (profiles ensuring the achievement of meta-subject, subject and personal results To possess:    - teaching methods in the subject area and the methodology for their selection taking into account the specifics of the content of the educational material, age and educational needs of students;    - modern educational technologies ensuring the achievement of students' meta-subject, subject and personal results;    - methods of monitoring, assessing and correcting learning results in the subject area
PCS-2 Able to apply subject knowledge in the implementation of the educational process	To know: - patterns, principles and levels of formation and implementation of educational content in the subject area; - structure, composition and didactic units of the content of a school subject in the subject area; - subject content in the subject area; - skills in selecting variable content taking into account the relationship between class and extracurricular forms of training in the subject area  To be able to: - select educational content for implementation in various forms of training in the subject area in accordance with the didactic goals, age characteristics of students and the requirements of the Federal State Educational Standard of General Education  To possess: - skills in applying a systematic approach to the development and implementation of director's projects when organizing concerts,

- skills in working in a creative team with other authors and
performers within a single artistic concept for the joint achievement of
high quality results of creative activity;
- methods of working on the technique of stage speech and speech art
skills

## 4. Requirements for organizational and pedagogical conditions for the implementation of the BPEP

General system requirements, requirements for material and technical and educational and methodological support, requirements for personnel and financial conditions for the implementation of the program correspond to the requirements of the Federal State Educational Standard for the training direction **44.03.01 Pedagogical Education.** 

The requirements for the applied mechanisms for assessing the quality of educational activities and training of students are given in the assessment and methodological materials.

## 5. Features of the organization of the educational process for disabled people and people with limited health capabilities

For students with limited health capabilities, an adapted program is developed (if necessary and with a personal application from the student) taking into account the characteristics of psychophysical development, individual capabilities and health status of such students. For disabled students, the program is adapted in accordance with the individual rehabilitation program of the disabled person.

The organization has created special conditions for disabled people and people with limited health capabilities that meet licensing requirements.
